EDUCATION

International Institute of Information Technology Raipur

B.Tech in Data Science and Artificial Intelligence — CGPA: 7.25/10

Chhattisgarh, India

Aug 2022 – May 2026

Dronacharya Public School

Science Stream — Percentage: 74%

Raipur, Chhattisgarh

Apr 2019 – May 2021

EXPERIENCE

Lejit.AI | AI Engineer Intern

Dec 2025 – Mar 2026

FastAPI, LangChain, LlamaIndex, FAISS, Ragas, WhatsApp Business API, Meta Cloud API

Remote

- Architected data pipelines connecting 3 government legal portals and the eCourts API to the company's LLM-powered legal platform, reducing manual data ingestion time by an estimated **80%**.
- Developed a WhatsApp Business API bot for conversational legal Q&A; reduced API costs by eliminating AiSensy BSP dependency through direct Meta Cloud API integration, saving **3,200 INR** every month in platform fees.
- Conducted thorough code reviews and implemented unit tests, identifying and resolving 2 critical bugs before production deployment, ensuring system stability.
- Integrated FastAPI-based microservices with LangChain to enable real-time document retrieval and Q&A across a corpus of **948,900+** legal documents.
- Resolved critical frontend UI bugs and API call bottlenecks, decreasing component render time by **60%** (from 5s to 2s) and significantly improving page load performance.
- Championed the adoption of Ragas framework for LLM evaluation, establishing a standardized scoring system that facilitated data-driven decisions and improved cross-functional collaboration with 3 product members.

PROJECTS

JusticeGuide – AI Legal Research Assistant | *FastAPI, LangChain, LlamaIndex, FAISS, Ragas, Gemini*

- Enabled non-lawyers, students, and litigants to query the Indian Penal Code in plain language, delivering cited, source-grounded answers in under 2 seconds.
- Built a RAG pipeline with LLM query enhancement, LlamaIndex CitationQueryEngine over 189 IPC chunks, FAISS IndexFlatIP (384-dim), Groq fallback chain, Arize Phoenix OTLP tracing, and a Ragas evaluation suite.

LogLens – AI Log Analysis | *FastAPI, React, DBSCAN, Sentence-Transformers, LangChain, Prometheus*

- Engineered a system that converts raw server log dumps into structured P1–P4 incident reports in seconds, solving the on-call problem of diagnosing production failures under time pressure.
- Implemented Z-score anomaly detection across error-rate, latency, and silence signals; applied DBSCAN semantic clustering; designed 7-rule root-cause inference across 5 log formats with LangChain LCEL report generation and deterministic fallback.

AI Resume Screening System | *Flask, Next.js, BERT, XGBoost, SpaCy, Sentence-Transformers, Redis*

- Developed a pipeline that screens and ranks resumes against job descriptions automatically, improving recruiter matching accuracy from **72%** to **85%** and cutting manual shortlisting time.
- Designed a 9-algorithm parallel ensemble (BERT, DistilBERT, SBERT, TF-IDF, NER, XGBoost, RF, SVM, MLP) with weighted rank aggregation, LangChain + Groq structured JD expansion, Redis result cache (TTL 1800s), and Prometheus latency histograms.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, C/C++, SQL

AI/ML: LangChain, LlamaIndex, FAISS, Ragas, Arize Phoenix, Sentence-Transformers, HuggingFace, Scikit-learn, XGBoost, BERT, DistilBERT, SpaCy, NLTK, OpenCV, DBSCAN

Tools & Tech: FastAPI, Node.js, Express, REST APIs, WebSockets, Docker, Prometheus, React, Next.js, Tailwind CSS, Recharts, PostgreSQL, MongoDB, Redis, Git

PUBLICATIONS & RECOGNITION

IEEE ACROSET 2024 – Co-Author: Published peer-reviewed paper achieving **93%** accuracy on facial recognition using CNNs at IEEE ACROSET 2024.

Amazon ML Summer School – Top 0.17% of 60,000+ Applicants: Selected for intensive industry program covering deep learning, computer vision, and NLP, led by Amazon scientists.

Hack-a-Sol 2024: Secured 2nd Runner-Up among **100+** participants for **LLM-powered** AI vulnerability scanner using **React.js** frontend and large language models.
